*Allowable Subject Matter*

1. **Claims 1-8** are allowed.

2. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach, disclose or suggest the claimed limitations of (in combination with all other limitations in the claim), a "density control method for an image forming apparatus having a plurality of image forming speeds, comprising: a first speed setting step of setting an image forming speed at which image formation is carried out by the image forming apparatus to a reference speed; a first control step of carrying out a maximum density control process at the reference speed in a manner such that image forming conditions are controlled such that a measured density of a first test image corresponding to a maximum density is equal to a predetermined value; a second control step of carrying out a density gradation control process at the reference speed to determine a conversion table for image signal conversion such that gradation characteristics of a second test image having a plurality of gradations are identical with predetermined characteristics; a second setting step of setting the image forming speed to a first speed other than the reference speed; and a third control step of carrying out the density gradation control process at the first speed", as claimed in **Claim 1**. Similar features are claimed in Claims 2-8. Therefore, **Claims 2-8** are allowable over the prior art of record for the same reasons.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
